  - (Trichomoniasis)
- Plan B/Ella
Follow-up

- Td
- Hep B
- HIV
  - Baseline testing within 1 week
  - 1 month
    - RPR, Gonorrhea, Chlamydia
  - 3 months
  - 6 months
  - 1 year
Medical Exam

- Overriding priority must always be the health and welfare of the patient
- Medical/forensic services of the SANE are of secondary importance
Blind Reporting

- Timely collection of forensic evidence is imperative to hold the perpetrator accountable for the sexual assault.
- Every effort should be made to facilitate treatment and evidence collection in a timely manner.
- Patients not ready to report a sexual assault to law enforcement may have a forensic examination completed as a “blind report.”
Confidentiality

- Medical record of the patient is confidential; protected by HIPAA
- Information disclosed in the forensic record is discoverable by the defense and should the case go to court, part of the medical record
